

# Ground Protection

## Plywood Panels

The uncoated plywood panels are made of Elliotis softwood glued together. The panels can be placed in several layers for a better point distribution of the weight.

Plywood panels are suitable for purposes like stage substructions and for routes of transport carrying low weight, e.g. in the backstage-area or between the stage and the mixing desk (FOH).

You can find more information and more rentable equipment on our website [www.japo.de](http://www.japo.de).

## Technical Details

### *plywood panel*

width	122 cm
length	244 cm
height	2 cm
weight	35 kg

### *transport*

tu	max. 50 panels
per trailer truck	ca. 1.800 sqm
