

Ground Protection

Remopla

Remopla is a solid panel for heavy load made of recycled plastic material. The fold (all around) guarantees simple laying and much stability.

Knobs on the surface guarantee slip resistance. The Remopla panels are adequate e.g. for short-term preparations of flat terrain for supply routes and car parks.

Remopla panels are of low flammability (according to B1).

We recommend applying PE- interlayers on sensitive ground like lawn or soft ground.

Accessories:

- access ramps

You can find more information and more rentable equipment on our website www.japo.de.

Technical Details

Remopla

width	115 cm
length	75 cm
height	4,5 cm
weight	ca. 32 kg
class	B1

transport

per trailer truck	ca. 620 sqm
