

Barriers and Security Gates

Security Gates for Entries

Our security gates for entries guarantee safe and controlled visitor traffic at events.

The system design of the entry security gates allows space-saving transport and storage.

The entry security gates consist of the following items:

- platform
- side handrail
- middle unit

The installation is quick and simple. Due to the use of middle units several entry security gates can be connected with each other guaranteeing stability.

The entry security gates are compatible with Mannesmann barriers (www.japo.de/mannheimer.html).

You can find more information and more rentable equipment on our website www.japo.de.
