

FENCE ROLL

- Fence roll for mobile fence
- Suitable for mobile fence of half and full height with
- 40 mm diameter
- Fixing with machine screw

TECHNICAL DETAILS

Weight 1-2.8 kg

AREAS OF USE

With the help of the fence roll you can integrate a gate or a passage in a barricade area. The fence roll is fixed at the bottom of a mobile fence panel; the fence panel can then be opened and closed like a gate by rolling it. For a smooth opening of the gates we recommend the use of a head bracket.
