

ARENA PANELS

- Material: continuous casting aluminum
- fully countersunk connection screws
- slightly profiled
- passable for vehicles with axle load of up to 12 t
- optimal weight distribution on sensitive underground
- trip-proof and flush transitions with our panel ramps

TECHNICAL DETAILS

Panel

Width 3.00 m
Height 0.048 m
Depth 2.15 m
Weight approx. 190 kg per panel

Universal ramp

Width 3.00 m
Depth (effective area) 0.46 m
Weight 61 kg

Initial ramp

Width 3.00 m
Depth (effective area) 0.24 m
Weight 39.5 kg

End ramp

Width 3.00 m
Depth (effective area) 0.23 m
Weight 37 kg

TRANSPORT

125 panels (838.50 m²) per semi-trailer (13.60 m)

AREAS OF USE

Rent our Arena Panels for getting an excellent solution for temporary protection of sensitive grounds (e.g. ground protection for lawn in

stadiums/arenas) from heavy traffic. Thanks to fully countersunk screws the Arena Panels are free from tripping hazards and thus absolutely pedestrian-friendly.
