## TRANSPORT

per pallet: 40 panels - 50 m<sup>2</sup>  
 per semi-trailer: 2240 m<sup>2</sup> pro 13,60 m Plane / Tautliner

## AREAS OF USE

### JAPO EVENT PRO GROUND PROTECTION COVERING SYSTEM

Rent an excellent solution for the temporary protection of sensitive surfaces with the professional lawn protection system. With a surface permeable to water, light and air, the ground protection system is ideal for lawns at concerts and events, football fields, listed parks or temporary walkways. Depending on the weather conditions, the system can ideally protect the lawn from external influences for up to five days. JAPO Event PRO panels are firmly connected to each other by a patented click system. JAPO Event PRO adapts flexibly to small uneven floors. No additional tools are required for dismantling. Special ramps in red and grey complete the system.

JAPO Event PRO Ground Protection Covering System is the optimal protection for your lawn for both small and major events. Valuable lawn is perfectly protected.
